

As a retired News employee of over 30 years for a major Television Network News Broadcasting company, I am protesting the proposed changes in the rules of ownership of all public media without proper disclosure by the FCC and review by Congress of all the changes prior to a vote of the FCC commissioners. The FCC was established to regulate the media for the benefit of all the people and they should be the ones who have the right to know how rule changes affect them prior to "secret" votings of the commissioners.
